WANTS A DIVORCE.

A Gypsy Princess, While in Chiengo, asked the boy's father. Violates One of the Traditions of Her Race.

Toda Uwaniwitch has applied for a divorce from her gypsy husband, Itanco, for the reason that he frequently compels her to dance while chained to and Western avenue, Chicago. The beautiful prophetess is enjoying the gypsy woman who ever dared to assert her rights and brave her husband's wrath.

The little divorce bill which now lies among the papers in the office of the

clerk of the superior court is a sign that one of the traditions of centuries among the wanderers has been broken. The Romany law is that the gypsy husband is always and forever the master of his wife. It is, moreover, an absolute mastery.

Toda, bedecked in her queer ornaments and wearing the inevitable shawl over her pretty head, handed her divorce bill over to William Mc Carthy, the process clerk, as though it was an every-day occurrence. She told Clerk McCarthy she was tired of her husband. She did not want to dance with Bruno any more. Anyway, she had another man whom she liked

by Liszt-and the little sturdy singer put all her soul into it. And the stout professor, with high Homeric forehead, seemed well pleased, for the girl was the best product of his class, and he had reason to pride himself upon her. She was just in the most poetic delineation of "Mignon" when a few canine notes, right from the front part of the audience, disturbed the harmony of the classic song and the serenity of the fair singer. The high-browed professor looked a little angry, but he went on with the accompaniment. He had not proceeded, very far when a few more canine ejaculations were heard. Now everybody in the audience caught on. Laughter was depicted on every face, and some of the ladies present snickered. But the professor and singer went bravely Now came another interruption from the pet dog in the audience, and the professor looked somewhat angry. What was the agreeable surprise of performers and audience when, on the rlosing notes of the song, the pet dog chimed in again, and, hitting the identical chord, brought the performance to a harmonious close.

Afraid of American Control.

The professional bull fighters in Havana recently held a meeting in that city and decided to draft a petition to President McKinley praying that after the Spanish evacuation and the beginning of American control, that there may be no legal steps taken to prevent them from carrying on their amusement. The bull fighters declare that their livelihood depends upon their ability to continue their chosen profession, and that it would be gross injustice to them to be deprived of the right, beside a sore disappointment to the people of Havans if their chief source of amusement and entertainment were forbidden. The gladiators will state in their petition that Gen. Lee, during his residence in Cuba, never missed an opportunity to witness a fight and was always to be seen at the arena and was very fond of the sport. They also state that all Americans who have witnessed a bull fight are greatly pleased with the performance, and will also point to the fact that visiting Americans never fall to attend one of these performances when they are in Havana. They believe that when their case is fully set forth that their business will not be interfered with. "

It took Germany much longer than France to comprehend the real strength and purposes of the United States in its dealings with Spain, and it is gratifying to us to learn even at this late day that there has been a decided change in German views toward us. Much of this new sentiment is due to the diplomacy of Admiral Dewey and the personal reports to the emperor of the German observers of the Santiago eampaign. United States Minister White has all along insisted that the official sentiment of Berlin was not antagonistic to us; but the German admiral at Manila and the most influential newspapers certainly reflected a different feeling. Now, the press, high officials and representatives of vast commercial interests have entirely changed their attitude, and are outspoken in the hope that the United States will not relinquish the Philippine islands, and, above all, will not return them to Spain, under whom the revolution and commercial troubles would be prolonged.

In an article in McClure's Magazine, Mr. Waldron upsets the time-honored theory that wheat is the most important crop in the world, and gives the palm to potatoes. Over 4,000,000,000 bushels of potatoes are produced each year, to 2,600,000,000 bushels of corn, while wheat takes third place with an annual production of only 2,500,000,000 bushels. Ireland leads all other countries in potato eating, the annual consumption there being 1,467 pounds to each person -or over four pounds a day. Germany, with an annual per capita consumption of 1,300 pounds, comes next; the Netherlands coming third, and Italy 48 pounds.

An organization to help the poor of Cuba by a system of industrial relief has been started in Brooklyn. The plan is to secure a tract of land near each suffering Cuban city, place an American in charge, and offer employment to the able-bodied poor in cultivating the land. The proceeds of the crops will be turned back into the relief fund. Individual workers will be assisted to return to their old homes as soon as they can sustain themselves. The rebuilding of destroyed homes and the establishment of free schools are among the objects of this relief movement.

One of the unique features of the late campaign in Pennsylvania was the use of the phonograph in the judicial fight in Alleghany county. John S. Robb, the independent republican candidate, delivered addresses one night at Mount Washington and Millvale, and while he was speaking at these places a phonograph was reeling off his address to a large audience at Bridgeville.
